

§ 223.32

12 CFR Ch. II (1–14 Edition)

the member bank from an affiliate under paragraph (a) of this section. The member bank initially must value the transaction at \$100,000, the total amount of the liabilities of the mortgage company. Going forward, if the member bank pays off the liabilities, the member bank must continue to value the covered transaction at \$100,000. If the member bank, however, sells \$15,000 of the transferred assets of the mortgage company or if \$15,000 of the transferred assets amortize, the member bank may value the covered transaction at \$85,000.

(d) *Exemption for step transactions.* A transaction described in paragraph (a) of this section is exempt from the requirements of this regulation (other than the safety and soundness requirement of § 223.13 and the market terms requirement of § 223.51) if:

(1) The member bank acquires the securities issued by the transferred company within one business day (or such longer period, up to three months, as may be permitted by the member bank's appropriate Federal banking agency) after the company becomes an affiliate of the member bank;

(2) The member bank acquires all the securities of the transferred company that were transferred in connection with the transaction that made the company an affiliate of the member bank;

(3) The business and financial condition (including the asset quality and liabilities) of the transferred company does not materially change from the time the company becomes an affiliate of the member bank and the time the member bank acquires the securities issued by the company; and

(4) At or before the time that the transferred company becomes an affiliate of the member bank, the member bank notifies its appropriate Federal banking agency and the Board of the member bank's intent to acquire the company.

(e) *Example of step transaction.* A bank holding company acquires 100 percent of the shares of an unaffiliated leasing company. At that time, the subsidiary member bank of the holding company notifies its appropriate Federal banking agency and the Board of its intent to acquire the leasing company from

its holding company. On the day after consummation of the acquisition, the holding company transfers all of the shares of the leasing company to the member bank. No material change in the business or financial condition of the leasing company occurs between the time of the holding company's acquisition and the member bank's acquisition. The leasing company has liabilities. The leasing company becomes an operating subsidiary of the member bank at the time of the transfer. This transfer by the holding company to the member bank, although deemed an asset purchase by the member bank from an affiliate under paragraph (a) of this section, would qualify for the exemption in paragraph (d) of this section.

§ 223.32 What rules apply to financial subsidiaries of a member bank?

(a) *Exemption from the 10 percent limit for covered transactions between a member bank and a single financial subsidiary.* The 10 percent quantitative limit contained in § 223.11 does not apply with respect to covered transactions between a member bank and a financial subsidiary of the member bank. The 20 percent quantitative limit contained in § 223.12 does apply to such transactions.

(b) *Valuation of purchases of or investments in the securities of a financial subsidiary—(1) General rule.* A member bank's purchase of or investment in a security issued by a financial subsidiary of the member bank must be valued at the greater of:

(i) The total amount of consideration given (including liabilities assumed) by the member bank in exchange for the security, reduced to reflect amortization of the security to the extent consistent with GAAP; and

(ii) The carrying value of the security (adjusted so as not to reflect the member bank's pro rata portion of any earnings retained or losses incurred by the financial subsidiary after the member bank's acquisition of the security).

(2) *Carrying value of an investment in a consolidated financial subsidiary.* If a financial subsidiary is consolidated with its parent member bank under GAAP, the carrying value of the member bank's investment in securities issued

by the financial subsidiary shall be equal to the carrying value of the securities on parent-only financial statements of the member bank, determined in accordance with GAAP (adjusted so as not to reflect the member bank's pro rata portion of any earnings retained or losses incurred by the financial subsidiary after the member bank's acquisition of the securities).

(3) *Examples of the valuation of purchases of and investments in the securities of a financial subsidiary.* The following are examples of how a member bank must value its purchase of or investment in securities issued by a financial subsidiary of the member bank. Each example involves a securities underwriter that becomes a financial subsidiary of the member bank after the transactions described below.

(i) *Initial valuation.* (A) *Direct acquisition by a member bank.* A member bank pays \$500 to acquire 100 percent of the shares of a securities underwriter. The initial carrying value of the shares on the member bank's parent-only GAAP financial statements is \$500. The member bank initially must value the investment at \$500.

(B) *Contribution of a financial subsidiary to a member bank.* The parent holding company of a member bank acquires 100 percent of the shares of a securities underwriter in a transaction valued at \$500, and immediately contributes the shares to the member bank. The member bank gives no consideration in exchange for the shares. The member bank initially must value the investment at the carrying value of the shares on the member bank's parent-only GAAP financial statements. Under GAAP, the member bank's initial carrying value of the shares would be \$500.

(ii) *Carrying value not adjusted for earnings and losses of the financial subsidiary.* A member bank and its parent holding company engage in the transaction described in paragraph (b)(3)(i)(B) of this section, and the member bank initially values the investment at \$500. In the following year, the securities underwriter earns \$25 in profit, which is added to its retained earnings. The member bank's carrying value of the shares of the underwriter is not adjusted for purposes of this

part, and the member bank must continue to value the investment at \$500. If, however, the member bank contributes \$100 of additional capital to the securities underwriter, the member bank must value the aggregate investment at \$600.

(c) *Treatment of an affiliate's investments in, and extensions of credit to, a financial subsidiary of a member bank—*(1) *Investments.* Any purchase of, or investment in, the securities of a financial subsidiary of a member bank by an affiliate of the member bank is treated as a purchase of or investment in such securities by the member bank.

(2) *Extensions of credit that are treated as regulatory capital of the financial subsidiary.* Any extension of credit to a financial subsidiary of a member bank by an affiliate of the member bank is treated as an extension of credit by the member bank to the financial subsidiary if the extension of credit is treated as capital of the financial subsidiary under any Federal or State law, regulation, or interpretation applicable to the subsidiary.

(3) *Other extensions of credit.* Any other extension of credit to a financial subsidiary of a member bank by an affiliate of the member bank will be treated as an extension of credit by the member bank to the financial subsidiary, if the Board determines, by regulation or order, that such treatment is necessary or appropriate to prevent evasions of the Federal Reserve Act or the Gramm-Leach-Bliley Act.

§ 223.33 What rules apply to derivative transactions?

(a) *Market terms requirement.* Derivative transactions between a member bank and its affiliates (other than depository institutions) are subject to the market terms requirement of § 223.51.

(b) *Policies and procedures.* A member bank must establish and maintain policies and procedures reasonably designed to manage the credit exposure arising from its derivative transactions with affiliates in a safe and sound manner. The policies and procedures must at a minimum provide for:

(1) Monitoring and controlling the credit exposure arising at any one time
